

Weatherization vs. Remodeling

The Weatherization Assistance Program is a federal program managed by the North Carolina Department of Environmental Quality. It is designed to help residents who meet federal low-income guidelines to lower their energy usage and costs. This is achieved by home weatherization and client education.

Weatherizing a home involves conducting an energy assessment to identify the most cost-effective energy improvements that need to be performed on the dwelling, and then making those improvements at no cost to the household.

The three major improvements performed in home weatherization are:

1. Reducing excessive air infiltration
2. Reducing heat loss through attics, walls and floors
3. Tuning or otherwise making the heating and air systems more efficient.

The Weatherization Program is **not** a remodeling, maintenance or rehabilitation program. The amount that can be spent on each dwelling is limited. Incidental repairs to the home are made only to facilitate the installation and preservation of weatherization materials, not to improve the value of a home.

As a rule, the Weatherization Program does not install windows or doors. On rare occasions, a primary window may be installed, but only when necessary to reduce significant air leakage. This is considered a low priority activity because it is not as cost-effective as other improvements, such as attic, wall and floor insulation and location and sealing air leakage sites. Program regulations prohibit the substitution of low priority measures for more cost-effective ones.

Typical improvements requested that are not allowable include window and door replacements, roof or siding replacements, mobile home skirting, painting and mold remediation.

Those applying for Weatherization who assume their home will be remodeled or repaired often become frustrated. Other programs are better suited for remodeling or quick repair purposes. Other housing or human services agencies should be contacted for home rehabilitation needs.

WAIT LIST FORM

Date _____

You are income qualified for the Weatherization Assistance Program; however, at the present you are on our waiting list for an energy audit to determine whether your home qualifies for the Weatherization Assistance Program (WAP). The Energy Audit will also determine the weatherization measures to install on your home. Each year WAP is allotted a limited number of slots to allow for home energy improvements. **A system has been carefully devised to prioritize all qualified WAP clients in an effort to remain fair; at present the approximate waiting period is up to 1 year or as long as funds are available.**

As your name comes up on the list for home energy improvements, you will receive a call from a Weatherization program representative to schedule an appointment to perform an energy audit on your home.

The Heating and Air Repair/Replacement (HARRP) is secondary to the Weatherization Assistance Program. The main purpose of the program is to repair your current heating/air system or to replace a non-working heating/air system with what you currently have in your home. HARRP is not designed to upgrade heating/air systems nor is it set up to do on-going maintenance of systems. **The same system that is used to prioritize the WAP clients is used to prioritize HARRP clients. Currently, the approximate waiting list period is 3 or more years, or as long as funds are available.**

If you have any questions, we can be reached at 910-223-0116. We look forward to helping you make your home more energy efficient.

With kind regards,

Weatherization Team
